[illegible]

ChatGPT is a large language model trained by OpenAI to generate human-like text. It is designed to be a helpful and harmless AI assistant. It can be used for a variety of tasks, including writing, editing, and generating text. It is currently available as a web application and as an API.

[illegible]

ChatGPT is a large language model trained by OpenAI, based on the GPT-3.5 architecture. It is designed to generate human-like text based on the prompts it receives. It can be used for a variety of tasks, including text completion, question answering, and code generation. ChatGPT is trained on a large dataset of text from the internet, books, and other sources. It is trained to understand the context of the conversation and to generate responses that are relevant and helpful. ChatGPT is a powerful tool for generating text and can be used in a variety of applications, including chatbots, content generation, and more.
