

Report conversation

Convert this Markdown file to a GitHub discussion category form:

```
md
---
name: Question and support
about: Your setup is not working and you need help
  PrivateBin
title: ''
labels: question/support
assignees: ''

---

<-- Describe the problem/question: A clear & concise description of the problem/question.

<!-- Please tick this to confirm, you did it
* [ ] Yes I have read [the FAQ](https://github.com/...)

## What you did
<!-- Tell us how to reproduce the problem.
1.
2.

### What happens

### What should happen

## Additional information
<!--
Here you can add screenshots. If the issue is related to a specific version, please provide it.
If you have access to the server log files,
-->

## Basic information
```

```
<!-- If you use a public server enter the address here -->
**Server address**:
```

```
<!-- The Operation System of your server -->
**Server OS:**
```

```
<!-- The webserver running on your server, if you use one -->
**Webserver:**
```

```
<!-- The version of your browser (when it is relevant) -->
**Browser:**
```

```
<!-- The version of PrivateBin, if you use one -->
**PrivateBin version:**
```

I can reproduce this issue on <https://privatebin.dev/>

To convert your Markdown file into a GitHub discussion category form, you can follow the GitHub-flavored Markdown syntax and structure for discussions. Here's the converted version:

markdown

 Copy code

```
---
```

```
name: Question and support
```

```
about: Your setup is not working and you need help or you have a question
```

```
title: 'Your Title Here'
```

```
labels: question/support
```

```
assignees: ''
```

```
---
```

Describe the problem/question

A clear and concise description of what the bug is.

```
<!-- Please tick this to confirm, you did it.-->
```

```
* [ ] Yes, I have read [the FAQ](https://github.com/PrivateBin/PrivateBin/
```

What you did

Tell us how to reproduce the problem.

1. Step 1
2. Step 2

What happens

Describe what currently happens when you follow the steps mentioned above.

What should happen

Describe what you expect to happen when you follow the steps mentioned above.

Additional information

<!-- Here you can add screenshots. If the issue is e.g. a client-side issue, attach them here. -->
If you have access to the server log files, also copy them here. -->

Basic information

<!-- If you use a public server enter the address of it here. -->

****Server address**:**

<!-- The Operating System of your server -->

****Server OS**:**

<!-- The webserver running on your server, preferably including the version -->

****Webserver**:**

<!-- The version of your browser (when it is a client-side issue) -->

****Browser**:**

<!-- The version of PrivateBin, if you use an unstable version paste the commit hash -->

****PrivateBin version**:**

I can reproduce this issue on <https://privatebin.net>

Note that GitHub Discussions do not directly support custom forms like the one you provided, but you can structure your post using the available Markdown elements to capture the necessary information. Also, make sure to replace 'Your Title Here' with an appropriate title for your discussion post.

No I meant the YAML-based syntax for discussion category forms.

Apologies for the misunderstanding. Here's the YAML-based syntax for your GitHub discussion category form:

yaml

 Copy code

```
name: Question and support
about: Your setup is not working and you need help or you have a question
title: 'Your Title Here'
labels: question/support
assignees: ''
```

Describe the problem/question

A clear and concise description of what the bug is.

<!-- Please tick this to confirm, you did it.-->

* [] Yes, I have read [the FAQ](https://github.com/PrivateBin/PrivateBin/)

What you did

Tell us how to reproduce the problem.

1. Step 1
2. Step 2

What happens

Describe what currently happens when you follow the steps mentioned above.

```
### What should happen
```

```
Describe what you expect to happen when you follow the steps mentioned above
```

```
## Additional information
```

```
<!-- Here you can add screenshots. If the issue is e.g. a client-side issue,
If you have access to the server log files, also copy them here. -->
```

```
## Basic information
```

```
<!-- If you use a public server enter the address of it here. -->
```

```
**Server address**:
```

```
<!-- The Operating System of your server -->
```

```
**Server OS**:
```

```
<!-- The webserver running on your server, preferably including the version -->
```

```
**Webserver**:
```

```
<!-- The version of your browser (when it is a client-side issue) -->
```

```
**Browser**:
```

```
<!-- The version of PrivateBin, if you use an unstable version paste the commit hash -->
```

```
**PrivateBin version**:
```

```
I can reproduce this issue on [https://privatebin.net](https://privatebin.net)
```

You can copy and paste this YAML-based syntax into a new discussion in your GitHub repository to create the desired category form. Make sure to replace 'Your Title Here' with an appropriate title for your discussion post.

No, here is an example for such a form syntax:

```
yaml
```

```
title: "[General] "
```

```
labels: ["General Introduction"]
```

```
body:
```

```
- type: markdown
```

```
attributes:
  value: |
    This is text that will show up in the
- type: textarea
  id: improvements
  attributes:
    label: Top 3 improvements
    description: "What are the top 3 improvements?"
    value: |
      1.
      2.
      3.
      ...
  render: bash
  validations:
    required: true
- type: markdown
  attributes:
    value: |
      ## Markdown header
      And some more markdown
- type: input
  id: has-id
  attributes:
    label: Suggestions
    description: A description about suggestions
  validations:
    required: true
- type: dropdown
  id: download
  attributes:
    label: Which area of this project could you improve?
    options:
      - Documentation
      - Pull request review time
      - Bug fix time
      - Release cadence
  validations:
    required: true
- type: checkboxes
```

```

attributes:
  label: Check that box!
  options:
    - label: This one!
      required: true
    - label: I won't stop you if you che
- type: markdown
  attributes:
    value: |
      ### The thrilling conclusion
      _to our template_

```

And here is the top-level syntax:

```

yaml
body:
- type: input
  id: suggestion
  attributes:
    label: Suggestion
    description: "How might we make this pro
    placeholder: "Adding a CODE_OF_CONDUCT.r
  validations:
    required: true

```

Understood! Here's the GitHub discussion category form you provided, converted into the format you're looking for:

yaml

 Copy code

```

title: "[Question and support] "
labels: ["question/support"]
body:
- type: markdown
  attributes:
    value: |
      Describe the problem/question: A clear and concise description of \

```

- type: checkboxes
attributes:
label: Please tick this to confirm
options:
 - label: Yes, I have read [the FAQ](https://github.com/PrivateBin/)
- type: markdown
attributes:
value: |

      - label: No
        value: No
```

This YAML structure represents the GitHub discussion category form with different input types and labels as you provided. You can copy and paste this YAML code into your GitHub repository's discussion settings to create the desired form for the "Question and support" category. Just make sure to customize the labels and options as needed.
