

GATE 1 Qualitative Patterns

Case ID	Outcome Class	Context (C)	Specificity (S)	Verification (V)	Structural Pattern	Prompt Excerpt	Why Representative	Generated Code?	Adopted?	Notes	PR Language
PA-22	PA	1	2	2	Explicitly evaluable implementation task	Kotlin の sksamuel/scrimage ライブラリで、画像上に文字列を描画し、文字列の縁取りをするコードを生成してください。文字の色は白、縁は黒で描画します。	The expected visual result is observable: white text with a black outline.	Yes	Yes	Paper-referenced adopted example.	Kotlin
PA-23	PA	2	2	2	Strong correctness constraints	I'd like to rewrite the following test case: describe('#1163 - https://github.com/jsdom/jsdom/issues/...') with sample DOM setup and expectations.	The prompt provides test-case context and expectations that support direct evaluation.	Yes	Yes	Adopted test-related example.	JSON
PA-21	PA	2	2	1	Bounded implementation with concrete code context	'use client'; import Link from 'next/link'; ... useDeleteLeagueMutation ... export default function LeagueList(...) ...	Existing component/mutation code gives enough implementation context for adoption decisions.	Yes	Yes	Adopted UI/API modification example.	TypeScript
PA-3	PA	2	2	2	Structured output expectations	I'm creating an open source collection of UI/UX design problem statements for freshers. Here's a category I have curated [...].	The prompt provides structured JSON/category examples and clear output shape expectations.	Yes	Yes	Adopted structured-data example.	TypeScript
PA-16	PA	2	1	1	Testable implementation request	When using activerecord-multi-tenant library in my Rails project, filters do not work. I prepared a fix and now I want to unit test it to see that the fix is actually working.	The prompt asks for a unit test to validate a concrete Rails filtering fix.	Yes	Yes	Adopted test/evaluation example.	Ruby
PN-19	PN	1	1	1	Weakly evaluable generated solution	Hello can you give me a regex to match ULID format? This one is correct? [0-7][0-9A-HJKMNP-TV-Z]{25}	The regex task is concrete, but acceptance examples and framework-specific validation are limited.	Yes	No	Paper-referenced generated-but-not-adopted example.	PHP
PN-25	PN	1	1	1	Implicit verification	git diff は違いがあった場合のステータスコードは何でしょうか。ありがとうございます。diffはどうでしょうか。	The prompt asks about command behavior but leaves adoption conditions implicit.	Yes	No	Workflow/CLI-oriented PN example.	YAML
PN-3	PN	2	1	0	Exploratory implementation request	How can I log progress and handle worker output in this migration/concurrency context?	The prompt explores a logging approach in a concurrent environment without explicit acceptance criteria.	Yes	No	Concurrency/logging PN example.	Java
PN-1	PN	1	1	0	Underspecified acceptance criteria	Can you show me how to use YARP in a project to bypass CORS restrictions on an API?	The prompt requests a YARP/CORS setup but lacks project constraints and validation conditions.	Yes	No	Proxy/configuration PN example.	Markdown
PN-2	PN	1	1	0	Weak framework alignment	How can I configure a GitHub Action workflow for this Python project?	The prompt is workflow-oriented but lacks enough project-specific constraints for confident adoption.	Yes	No	Additional PN example with weak evaluability.	Python
